*The Most Important Thing I Know About...* Lorne A. Adrain, 2001-10 The author of the successful The Most Important Thing I Know series has compiled an all-inclusive volume on love, success, faith, friendship, family, and more. In their own handwriting, some of the world's most influential voices share their intimate and inspiring thoughts.

**Confronting Suburban Poverty in America** Elizabeth Kneebone, Alan Berube, 2014-01-13 It has been nearly a half century since President Lyndon Johnson declared war on poverty. Back in the 1960s tackling poverty “in place” meant focusing resources in the inner city and in rural areas. The suburbs were seen as home to middle- and upper-class families—affluent commuters and homeowners looking for good schools and safe communities in which to raise their kids. But today’s America is a very different place. Poverty is no longer just an urban or rural problem, but increasingly a suburban one as well. In *Confronting Suburban Poverty in America*, Elizabeth Kneebone and Alan Berube take on the new reality of metropolitan poverty and opportunity in America. After decades in which suburbs added poor residents at a faster pace than cities, the 2000s marked a tipping point. Suburbia is now home to the largest and fastest-growing poor population in the country and more than half of the metropolitan poor. However, the antipoverty infrastructure built over the past several decades does not fit this rapidly changing geography. As Kneebone and Berube cogently demonstrate, the solution no longer fits the problem. The spread of suburban poverty has many causes, including shifts in affordable housing and jobs, population dynamics, immigration, and a struggling economy. The phenomenon raises several daunting challenges, such as the need for more (and better) transportation options, services, and financial resources. But necessity also produces opportunity—in this case, the opportunity to rethink and modernize services, structures, and procedures so that they work in more scaled, cross-cutting, and resource-efficient ways to address widespread need. This book embraces that opportunity. Kneebone and Berube paint a new picture of poverty in America as well as the best ways to combat it. *Confronting Suburban Poverty in America* offers a series of workable recommendations for public, private, and nonprofit leaders seeking to modernize poverty

alleviation and community development strategies and connect residents with economic opportunity. The authors highlight efforts in metro areas where local leaders are learning how to do more with less and adjusting their approaches to address the metropolitan scale of poverty—for example, integrating services and service delivery, collaborating across sectors and jurisdictions, and using data-driven and flexible funding strategies. “We believe the goal of public policy must be to provide all families with access to communities, whether in cities or suburbs, that offer a high quality of life and solid platform for upward mobility over time. Understanding the new reality of poverty in metropolitan America is a critical step toward realizing that goal.”—from Chapter One

**Creative Communities** Michael Rushton, 2013-04-12 Urban and regional planners, elected officials, and other decisionmakers are increasingly focused on what makes places livable. Access to the arts inevitably appears high on that list, but knowledge about how culture and the arts can act as a tool of economic development is sadly lacking. This important sector must be considered not only as a source of amenities or pleasant diversions, but also as a wholly integrated part of local economies. Employing original data produced through both quantitative and qualitative research, Creative Communities provides a greater understanding of how art works as an engine for transforming communities. Without good data and analysis—much of it grounded in economic theory—we cannot hope to strengthen communities through the arts or to achieve any of the other goals we set for the National Endowment for the Arts, the largest nationwide funder of the arts. —from the Foreword by Rocco Landesman Contributors: Hasan Bakhshi (Nesta UK), Elisa Barbour (University of California, Berkeley), Shiri M. Breznitz (Georgia Institute of Technology), Roland J. Kushner (Muhlenberg College), Rex LaMore (Michigan State University), James Lawton (Michigan State), Neil Lee (Nesta UK), Richard G. **Starting Over** Albert Fishlow, 2011-06-30 Brazil has undergone transformative change since the 1980s, from an authoritarian regime to a democratic society advancing on all fronts—political, social, economic, and diplomatic. In Starting Over, Albert Fishlow traces the evolution of this member of the BRICS group over the last twenty-five years and looks toward the future as the newly elected president, Dilma Rousseff, follows her very popular predecessor, Luiz Inácio Lula da Silva, or Lula. The transformation of the country began with the founding of the Nova República and the Constitution of 1988, which established a strong executive and encased key social principles such as a citizen's right to education and health care. Then

the Real Plan of 1994—initiated under President Fernando Henrique Cardoso—set the stage for economic growth and a stable economy. There were setbacks, especially in the mid-1990s with the Mexican devaluation, Asian financial crisis, Russian default, and Argentine collapse, and, later, the U.S. recession. But changed economic policies in the late 1990s put Brazil on the right path to future economic growth, which resumed during the Lula years. With popular participation in the electoral process at an all-time high, politics has been profoundly altered in Brazil. Economic rules are now more permanent, and economic advance more regular. A healthier and longer life is now available to a broader swath of the population, and there is opportunity for social advancement. In addition, its foreign policy has greater consequence internally as well as externally. Dilma's two immediate predecessors—Cardoso and Lula—are tough acts to follow. Their influence has been profound, and Brazil is now a very different nation than it was in the 1980s. But she is working from their template to move the country forward. This insightful book clearly explains how and why the country has progressed to its current standing and what the future portends. *Starting Over* is essential reading

**Delivering Aid Differently** Wolfgang Fengler, Homi J. Kharas, 2010 A series of essays provides an overview of foreign-aid programs today, which utilize nongovernmental sources of aid more than ever, and offers solutions as to how to better coordinate this aid from a variety of sources. Original.

*Cuba's Energy Future* Jonathan Benjamin-Alvarado, 2010 Examines what Cuba must do to ensure energy sustainability and self-sufficiency in order to secure its future, including advancing relationships with its neighbors, and discusses ways the island nation might seek greater cooperation with the United States in these endeavors--Provided by publisher.

**Aspiration and Ambivalence** Vanda Felbab-Brown, 2013 Analyzes the U.S. and international efforts in Afghanistan and offers detailed recommendations for dealing with the precarious situation leading up to the 2014 transition to Afghan control and beyond.

*Shaping the Emerging World* Waheguru Pal Singh Sidhu, Pratap Bhanu Mehta, Bruce D. Jones, 2013-08-01 India faces a defining period. Its status as a global power is not only recognized but increasingly institutionalized, even as geopolitical shifts create both opportunities and challenges. With critical interests in almost every multilateral regime and vital stakes in emerging ones, India has no choice but to influence the evolving multilateral order. If India seeks to affect the multilateral order, how will it do so? In the past, it had little choice but to be content with rule taking—adhering to existing international norms and institutions. Will it now focus on rule breaking—challenging the present order primarily for effect and seeking greater accommodation in existing institutions? Or will it focus on rule shaping—contributing in partnership with others to shape emerging norms and regimes, particularly on energy, food, climate, oceans, and cyber security? And how do India's troubled neighborhood, complex domestic politics, and limited capacity inhibit its rule-shaping ability? Despite limitations, India increasingly has the ideas, people, and tools to shape the global order—in the words of Jawaharlal Nehru, not wholly or

in full measure, but very substantially. Will India emerge as one of the shapers of the emerging international order? This volume seeks to answer that question.

*Last Exit* Clifford Winston, 2010-09-01 In *Last Exit* Clifford Winston reminds us that transportation services and infrastructure in the United States were originally introduced by private firms. The case for subsequent public ownership and management of the system was weak, in his view, and here he assesses the case for privatization and deregulation to greatly improve Americans' satisfaction with their transportation systems.

*Detention and Denial* Benjamin Wittes, 2011 Issues a call for a change in U.S. policy regarding the detention of enemy combatants, as exemplified by the situation at Guantanamo Bay, and provides ways in which the United States could bring some clarity and conviction to the issue. By the author of *Law and the Long War: The Future of Justice in the Age of Terror*.

*Global Civics* Hakan Altinay, 2011 The simple yet challenging goal of this book is to deliberate the legitimacy, and advance the feasibility, of an important new concept — the notion of global civics. We cannot achieve the international cooperation that is needed for a globalizing and interdependent century without embracing and implementing this important concept. The first section of *Global Civics* is a presentation of the overall idea itself; the second section consists of diverse assessments from around the world of the concept and where it currently stands. The third section discusses various options for a global civics curriculum. Praise for the Global Civics Program I agree with Hakan Altinay that in order to navigate our global interdependence, we need processes where we all think through our own responsibilities toward other fellow humans and discuss our answers with our peers. A conversation about a global civics is indeed needed, and university campuses are ideal venues for these conversations to start. We should enter this conversation with an open mind, and not insist on any particular point of view. The process is the key, and we should not wait any longer to start it. — Martti Ahtisaari, 2008 Nobel Peace Laureate The growing interconnectivity among people across the world is nurturing the realization that we are all part of a global community. This sense of interdependence, commitment to shared universal values, and solidarity among peoples across the world can be channeled to build enlightened and democratic global governance in the interests of all. I hope that universities and think tanks around the world will deploy their significant reservoirs of knowledge and creativity to develop platforms to enable students to study and debate these issues. This project is a contribution toward that goal and I look forward to following it closely. — Kofi Annan, Former Secretary General of the United Nations, 2001 Nobel Peace Laureate

**Healing the Wounded Giant** Michael E. O'Hanlon, 2013 The author considers the best balance between fiscal responsibility and national security in a period of continued economic stress. He believes that savings in the range of what Obama proposed in 2012 are the right goal for defense cost reductions in the coming years. He explains why cuts of the magnitude required by sequestration, and those suggested by the Bowles-Simpson and the Rivlin-Domenici plans for greater

fiscal health, are too deep on strategic grounds, particularly in light of America's rebalancing toward Asia and ongoing turbulence in the Middle East.

*Urban and Regional Policy and its Effects* Nancy Pindus,Howard Wial,Harold Wolman,2011-01-01 Urban and Regional Policy and Its Effects, the third in a series, sets out to inform policymakers, practitioners, and scholars about the effectiveness of select policy approaches, reforms, and experiments in addressing key social and economic problems facing cities, suburbs, and metropolitan areas. The chapters analyze responses to five key policy challenges that most metropolitan areas and local communities face: • Creating quality neighborhoods for families • Governing effectively • Building human capital • Growing the middle class • Enlarging a competitive economy through industry-based strategies • Managing the spatial pattern of metropolitan growth and development Each chapter discusses a specific topic under one of these challenges. The authors present the essence of what is known, as well as its likely applications, and identify the knowledge gaps that need to be filled for the successful formulation and implementation of urban and regional policy.

**Catalyzing Development** Homi Kharas,Koji Makino,Woojin Jung,2011-06-21 Some may dispute the effectiveness of aid. But few would disagree that aid delivered to the right source and in the right way can help poor and fragile countries develop. It can be a catalyst, but not a driver of development. Aid now operates in an arena with new players, such as middle-income countries, private philanthropists, and the business community; new challenges presented by fragile states, capacity development, and climate change; and new approaches, including transparency, scaling up, and South-South cooperation. The next High Level Forum on Aid Effectiveness must determine how to organize and deliver aid better in this environment. Catalyzing Development proposes ten actionable game-changers to meet these challenges based on in-depth, scholarly research. It advocates for these to be included in a Busan Global Development Compact in order to guide the work of development partners in a flexible and differentiated manner in the years ahead. **The Perils of Proximity** Richard C. Bush,2010 Evaluates the chances of war between China and Japan, presenting the dangers it would pose and revealing the steps that could prevent such a disaster. By the author of Untying the Knot: Making Peace in the Taiwan Strait.

*Good Intentions, Bad Outcomes* Santiago Levy,2010-01-01 Despite various reform efforts, Mexico has experienced

economic stability but little growth. Today more than half of all Mexican workers are employed informally, and one out of every four is poor. Good Intentions, Bad Outcomes argues that incoherent social programs significantly contribute to this state of affairs and it suggests reforms to improve the situation. Over the past decade, Mexico has channeled an increasing number of resources into subsidizing the creation of low-productivity, informal jobs. These social programs have hampered growth, fostered illegality, and provided erratic protection to workers, trapping many in poverty. Informality has boxed Mexico into a dilemma: provide benefits to informal workers at the expense of lower growth and reduced productivity or leave millions of workers without benefits. Former finance official Santiago Levy proposes how to convert the existing system of social security for formal workers into universal social entitlements. He advocates eliminating wage-based social security contributions and raising consumption taxes on higher-income households to simultaneously increase the rate of growth of GDP, reduce inequality, and improve benefits for workers. Good Intentions, Bad Outcomes considers whether Mexico can build on the success of Progres-a-Oportunidades, a targeted poverty alleviation program that originated in Mexico and has been replicated in over 25 countries as well as in New York City. It sets forth a plan to reform social and economic policy, an essential element of a more equitable and sustainable development strategy for Mexico.

**Lives in the Balance**, 2010-07-23 Investigates the use of foreign aid by developing countries and offers solutions for making sure the money goes where it should. Original.

*Who Has the Cure?* Jason Furman, 2009-09-01 The Hamilton Project at the Brookings Institution was established to foster policy innovation from leading economic thinkers—ideas based on evidence and experience, not ideology and doctrine. The overall goal is to promote America's long-term economic growth, and economic security for American families. This important book brings The Hamilton Project's approach to one of the most critical issues facing Americans today—health care. In *Who Has the Cure?* a team of noted economists and policy analysts emphasizes the importance of universal health care—not just its value to individual and families, but also the overall economy. They examine in detail four policy alternatives for achieving universal health insurance coverage that would also improve efficiency in the health care industry. The contributors to this volume also evaluate proposals designed to make health care more affordable and effective. Among the possible strategies studied here are an expansion of preventive care, income-related cost sharing, and reform of Medicare's prescription drug benefit.
