**Black Inventors** Keith Holmes, 2012-05 *Black Inventors, Crafting Over 200 Years of Success*, highlights the work of Black inventors from over seventy countries. The author, Keith C. Holmes, has spent more than twenty years researching Black inventors from countries that include Australia, Bahamas, Barbados, Canada, Cuba, Ethiopia, France, Germany, Ghana, Dominican Republic, Guadeloupe, Guyana, Haiti, Italy, Jamaica, Japan, Kenya, Mozambique, Nigeria, St. Vincent, South Africa, Tanzania, Trinidad and Tobago, the United Kingdom and the United States. Without inventions, innovations, financial resources, materials, muscle and labor saving devices, civilizations cannot exist and flourish. This book documents a number of inventions, patents and labor saving devices conceived by Black inventors. Among many other inventions, pre-enslaved Africans, developed agricultural tools, building materials, medicinal herbs, cloth and weapons. Although historical documents emphasize that millions of Black people arrived in Canada, the Caribbean, Central and South America and the United States under slavery's yoke, it is relatively unknown that thousands of Africans and their descendants developed numerous labor-saving devices and inventions that spawned companies which generated money and jobs, worldwide. While most authors focus primarily on American and European inventors, Keith Holmes introduces inventions, both past and present, that Black people, developed and patented globally and multiculturally. *Black Inventors, Crafting Over 200 Years of Success*, also features early Black inventors from virtually every state in the US. It includes details about the first Black inventor who obtained a patent in both the Caribbean and the United States. To date, seventeen African American men have been inducted into the National Inventors Hall of Fame. Two inventors, Jan E. Matzeliger, (Suriname) and Elijah McCoy, (Colchester, Canada) were not born in this country. The material available in this book, one of the first to address the diversity of black

inventors and their inventions from a global perspective, effectively gives the reader, researcher, librarian, student, and teacher the materials they need to understand that the Black inventor is not only a national phenomenon, but also a global giant.

*Construction Accident Law* Marc M. Schneier,1999 Twenty years ago, there were 2500 lawyers in China, basically no legal system, and law schools and law libraries had either been closed or destroyed. It was one of the poorest countries in the world with an adult literacy rate of one-third. Today, illiteracy has dropped to below 10 per cent, consumption has more than doubled, and China has exploded as a major economic force in the global community, with the USA alone investing billions of dollars, aside from pursuing an increasing number of untapped markets. Now with more than 100,000 lawyers and mandated Rule of Law, China has enacted a multitude of new laws, regulations, and orders that must be understood if one wants to do any kind of foreign investment or trade in that country. This work is a guide to the complex laws of China. It opens with a survey of the historical development of China's contemporary legal system, and provides a summary of Chinese legislative and regulatory institutions and their functions. It also gives an overview of the judiciary and the many forces affecting China's evolving legal system.
