**Make Your Own History** Joseph H. Holland, 2023-10-24 Celebrating the vast breadth and scope of Black excellence, *Make Your Own History* shares success principles exemplified by 120 Black unsung heroes who have blazed trails throughout American history. One hundred and twenty Black leaders, innovators, and entrepreneurs share their wisdom and experience across the centuries in *Make Your Own History*, an inspiring collection of exemplary Black voices—past and present, familiar and unsung—which have the power to guide us today. *Make Your Own History* gathers together motivational quotes, historical contexts, and enlightening precepts from Black trailblazers spanning the eighteenth century to the present. These insights encompass twelve central themes: courage, self-discipline, compassion, perseverance, teamwork, integrity, industriousness, self-reliance, optimism, purposefulness, civility, and faith. These vigorous virtues will: \*Deepen your courage through journalist Ida B. Wells’ strategic activism in the face of professional and personal peril . . . \*Fuel your perseverance through tennis superstar Serena Williams’ journey to 23 Grand Slam singles titles . . . \*Spark optimism through poet Langston Hughes’ work as an artistic and intellectual catalyst for the Harlem Renaissance . . . Through these perspectives and so many more, *Make Your Own History* serves not only as an uplifting historical resource, but also as a spiritual road map for the life-long journey of purposefully setting and meeting personal goals. These pioneers are more than historic examples of Black excellence; their unique lives highlight universal truths that will inspire all readers to achieve great success and make their own history.

**Navigating Through Time** Eric Jones, 2024-03-04 Navigating through time takes you on an introspective journey to explore the core tenets of philosophy and the nature of being, so that one can look in the mirror and ask the question “who are you really”? What makes up your thoughts, your actions, your character and are you happy. Who do you want to be? Where do you want to go? Although some of us can spend a lifetime exploring, the ultimate answer lies in the heart of the seeker. Wisdom and philosophy are intricately linked because both can occupy your mind with the nature of things and more importantly help you set a course to either find or create your place in this world. Wisdom is the purest form of reasoning laced with reflection. Through wisdom you learn how to dance with all the rhythm and agility one would need in order to avoid life’s difficulties. Some of us get lucky and inherit wisdom but for others it has to be developed. In either case wisdom can be both contagious and transformative giving an opportunity to become a better version of ourselves. Faith is another

important element when discussing self-discovery, the most common definition I have heard of faith is the evidence of things unseen. Although an important ingredient, faith is not limited to religion, but rather encompasses one's trust, values and touches the very nature of our existence. Faith is the invisible thread that weaves through our lives connecting our dreams, our values and our actions. Faith gives us a chance to connect with the intensity and the resilience of the human spirit. In this book we explore finances through the lens of understanding the connections between our financial decisions and the quality of life that we want. We also navigate into discussions revolving around the impact of lifelong relationships and how important it is to be good to those around us. Each day presents an opportunity to exercise your wisdom, faith master your finances, and tell your story. I am grateful to serve you in this journey to find greater purpose and fulfillment.

**21st Century Black Changemakers** Daniel J. Middleton, 2021-07-01 In this unique biography coloring book, twelve ready-to-color portraits sit across from short profiles of 21st-century black changemakers, people from various fields who have made history in this century. Color the grayscale pages that follow each bio. The same images are presented in full color, so feel free to use the completed color versions as references or use your own color palettes to create your renditions. This is a coloring book like you've never experienced. Not only will you engage in hours of coloring fun, but you'll also learn about the subjects presented here. Among the changemakers you'll meet are the first black secretary of defense, the first black female head of a major cable news network, the youngest floor trader at the New York Stock Exchange, the lead developer of Voice over Internet Protocol (VoIP), the youngest inaugural poet in the nation, the wealthiest black person in the U.S., and several others. Instead of the usual black line art you've seen in other coloring books, 21st Century Black Changemakers features detailed grayscale images in a refined style that brings the subjects to life. Adding your touch of color will lift the art to even greater levels. Prepare to be stimulated!

**Black Inventors** Kathy Trusty, 2021-06-29 Discover 15 inventors and inventions that changed the world in this guide for kids ages 8 to 12 Throughout history, Black inventors have achieved some of the world's greatest advancements in science, technology, engineering, and math. This book highlights 15 men and women who made a big impact with their inventions—from Marie Van Brittan Brown, who created the first home security system, to Mark Dean, who invented the personal computer. Learn all about each inventor's creative process, their invention, and the way it's benefited our world. The first Black man of science—Explore how Benjamin Banneker used his knowledge of math and science to build the first wooden clock, create an almanac, and help design the city that became Washington, D.C. An innovator in Black hair care—Learn how Lyda Newman became an inventor at the early age of 14, when she engineered an improved hairbrush design that made it easier and more affordable to properly care for Black hair. A web technology expert—Find out how Lisa Gelobter developed internet technology inventions that people rely on every day, including web animation, GIFs, and online videos. Take a journey through the stories of Black inventors and their inventions, with this guide designed just for kids.

*This Little Engineer* Joan Holub,2023-01-17 Meet the engineers who are building our future in innovative and surprising ways in this STEM-based board book in the bestselling This Little series! Now even the youngest readers can learn all about the amazing work engineers do every day! Highlighting ten memorable people who paved the way, parents and little ones alike will love this discovery primer full of fun, age-appropriate facts and bold illustrations.

*Entrepreneurship* Heidi M. Neck,Christopher P. Neck,Emma L. Murray,2016-11-30 From Heidi Neck, one of the most influential thinkers in entrepreneurship education today, Chris Neck, an award-winning professor, and Emma Murray, business consultant and author, comes this ground-breaking new text. *Entrepreneurship: The Practice and Mindset* catapults students beyond the classroom by helping them develop an entrepreneurial mindset so they can create opportunities and take action in uncertain environments. Based on the world-renowned Babson Entrepreneurship program, this new text emphasizes practice and learning through action. Students learn entrepreneurship by taking small actions and interacting with stakeholders in order to get feedback, experiment, and move ideas forward. Students walk away from this text with the entrepreneurial mindset, skillset, and toolset that can be applied to startups as well as organizations of all kinds. Whether your students have backgrounds in business, liberal arts, engineering, or the sciences, this text will take them on a transformative journey.

**Crazy Is a Compliment** Linda Rottenberg,2016-03 Reveals how companies like GE and Burberry have broken the corporate mould, and introduces us to entrepreneurs like Leila Velez, who started a multi-million hair-care company from her kitchen sink in Rio.

*Algorithmic Reason* Claudia Aradau,Professor of International Politics Claudia Aradau,Distinguished University Professor of Artificial Intelligence Tobias Blanke,Tobias Blanke,2022-05-07 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Are algorithms ruling the world today? Is artificial intelligence making life-and-death decisions? Are social media companies able to manipulate elections? As we are confronted with public and academic anxieties about unprecedented changes, this book offers a different analytical prism through which these transformations can be explored. Claudia Aradau and Tobias Blanke develop conceptual and methodological tools to understand how algorithmic operations shape the government of self and other. They explore the emergence of algorithmic reason through rationalities, materializations, and interventions, and trace how algorithmic rationalities of decomposition, recomposition, and partitioning are materialized in the construction of dangerous others, the power of platforms, and the production of economic value. The book provides a global transdisciplinary perspective on algorithmic operations, drawing on qualitative and digital methods to investigate controversies ranging from mass surveillance and the Cambridge Analytica scandal in the UK to predictive policing in the US, and from the use of facial recognition in China and drone targeting in Pakistan to the

regulation of hate speech in Germany.

**Water Sign** Delvina Leona Johnson,2023-09-12 This story is mixed with heart piercing romance, explicit sex adult content, science-fiction, violence and comedy. Parts of this book are true events, true feelings mixed with imaginal whimsical fantasy. Incorporated with fictional powers, human self-sacrifice, human responsibilities and accountability. The historic content is true history. Assimilates fictional Earth Gods with zodiac powers, super-hero's/heroine's, action and adventure. A must-read literature.

Tech Agnostic Greg Epstein,2024-10-29 An urgently needed exploration of global technology worship, and a measured case for skepticism and agnosticism as a way of life, from the New York Times–bestselling author of Good without God. Today's technology has overtaken religion as the chief influence on twenty-first century life and community. In Tech Agnostic, Harvard and MIT's influential humanist chaplain Greg Epstein explores what it means to be a critical thinker with respect to this new faith. Encouraging readers to reassert their common humanity beyond the seductive sheen of "tech," this book argues for tech agnosticism—not worship—as a way of life. Without suggesting we return to a mythical pre-tech past, Epstein shows why we must maintain a freethinking critical perspective toward innovation until it proves itself worthy of our faith or not. Epstein asks probing questions that center humanity at the heart of engineering: Who profits from an uncritical faith in technology? How can we remedy technology's problems while retaining its benefits? Showing how unbelief has always served humanity, Epstein revisits the historical apostates, skeptics, mystics, Cassandras, heretics, and whistleblowers who embody the tech reformation we desperately need. He argues that we must learn how to collectively demand that technology serve our pursuit of human lives that are deeply worth living. In our tumultuous era of religious extremism and rampant capitalism, Tech Agnostic offers a new path forward, where we maintain enough critical distance to remember that all that glitters is not gold—nor is it God.

**Beyond Eureka!** Marylène Delbourg-Delphis,2024 This tour-de-force of the history of the implementation of innovation seeks to address one of the biggest problems faced by entrepreneurs and corporate executives alike: the conflation of entrepreneurship with innovation. They are not the same, and they each come with their own challenges and opportunities. Starting a business is not the same as innovating a new product or service. Many books explain how to pitch, start and scale a company, as well as how to structure engineering, product, sales, marketing, and financial departments. It's implied that the company has a product or a service that has enough differentiators for the organization to succeed in the marketplace and that its founders and teams will thereby automatically be perceived as innovators. People get their understanding of what innovating means from various informal and formal sources, but it's when they get into creating something novel, whether a new product, conceptual breakthrough or business model, that they truly begin to reflect on what they thought they knew. It is then that they often become confused by the conventional wisdom. Silicon Valley pioneer and serial

entrepreneur Marylene Delbourg-Delphis answers the most important questions about innovation that she has been asked by other founders and CEOs over the years. Packed with the benefits of hands-on experience, historical knowledge, and conceptual analysis, this book is a critical foundation for innovators, whether entrepreneurs or the strategic leadership teams of established companies, including heads of sales, marketing, operations, and product development--

*Demystifying Deep Learning* Douglas J. Santry, 2023-12-12 Discover how to train Deep Learning models by learning how to build real Deep Learning software libraries and verification software! The study of Deep Learning and Artificial Neural Networks (ANN) is a significant subfield of artificial intelligence (AI) that can be found within numerous fields: medicine, law, financial service, and science, for example. Just as the robot revolution threatened blue-collar jobs in the 1970s, so now the AI revolution promises a new era of productivity for white collar jobs. Important tasks have begun being taken over by ANNs, from disease detection and prevention to reading and supporting legal contracts, to understanding experimental data, model protein folding, and hurricane modeling. AI is everywhere—on the news, in think tanks, and occupies government policy makers all over the world—and ANNs often provide the backbone for AI. Relying on an informal and succinct approach, *Demystifying Deep Learning* is a useful tool to learn the necessary steps to implement ANN algorithms by using both a software library applying neural network training and verification software. The volume offers explanations of how real ANNs work, and includes 6 practical examples that demonstrate in real code how to build ANNs and the datasets they need in their implementation, available in open-source to ensure practical usage. This approachable book follows ANN techniques that are used every day as they adapt to natural language processing, image recognition, problem solving, and generative applications. This volume is an important introduction to the field equipping the reader for more advanced study. *Demystifying Deep Learning* readers will also find: A volume that emphasizes the importance of classification Discussion of why ANN libraries (such as Tensor Flow and Pytorch) are written in C++ rather than Python Each chapter concludes with a “Projects” page to promote students experimenting with real code A supporting library of software to accompany the book at <https://github.com/nom-de-guerre/RANT> Approachable explanation of how generative AI, such as generative adversarial networks (GAN) really work. An accessible motivation and elucidation of how transformers, the basis of large language models (LLM) such as ChatGPT, work. *Demystifying Deep Learning* is ideal for engineers and professionals that need to learn and understand ANNs in their work. It is also a helpful text for advanced undergraduates to get a solid grounding on the topic.

**The Black History Activity Book** Daniel J. Middleton, 2021-06-14 From Juneteenth and unsung civil rights activists to daring female aviators to black EMTs who pioneered the profession, *The Black History Activity Book* will entertain, educate, and enlighten as you make your way through its pages. Learn about important figures and events in black history in a way you haven't experienced before, and then you can test your knowledge and explore further with trivia questions, crossword

puzzles, word searches, and detailed coloring pages that will keep you stimulated for hours. This activity book features the inspirational biographies of black pioneers and trailblazers in various fields. You'll meet the inventor Frederick McKinley Jones, the opera sensation Marian Anderson, and the founder of an exclusive all-black California town, among several others. You will also be presented with a brief history of Newark, complete with an ethnic transformation that created a stew for racial violence and uprising. Each biographical article is followed by at least one related activity and an associated coloring page for your enjoyment. Unlike other books on the market that feature well-known subjects and events from black history, The Black History Activity Book covers obscure history makers, whose triumphs, struggles, and dreams are also worth telling. Prepare to be edified!

**Ara the Star Engineer** Komal Singh, 2018-10-16 This is a STEM book and more! An inspiring, inclusive, whimsical way to learn about computers and technology from real-life trailblazers. Read the book, download hands-on activities, follow learning resources. Visit the website [www.arastarengineer.com](http://www.arastarengineer.com) for more. Ara is a young girl who loves BIG numbers. She wants to count all the stars in the sky... but how? This is an upbeat adventure of Ara and her sidekick droid, DeeDee ("Beep!"). They use smarts and grit to solve a BIG problem and discover an amazing algorithm! A quest that takes them through a whirlwind of intriguing locations at Innovation Plex -- Data Centre, Ideas Lab, Coding Pods, and X-Space. Along the way, they encounter real-life women tech trailblazers of diverse backgrounds, including a Tenacious Troubleshooter, an Intrepid Innovator, a Code Commander, and a Prolific Problem Solver. They tinker-and-tailor, build-and-fail, launch-and-iterate, and in the end discover an amazing algorithm of success -- coding, courage, creativity, and collaboration ("Beeeeeep!"). Ara is making a splash with industry CEOs and best-selling kids authors. "If she can see it, she can be it.' With this story, girls can see leaders and be inspired to become one. A book for all ages and genders!" - Geena Davis, Founder and Chair, Geena Davis Institute on Gender in Media

**Great Minds of Science (Black Lives #1)** Tonya Bolden, 2024-09-10 Dive in to an exciting nonfiction graphic novel series about some of the greatest Black lives in history! Sure to delight middle graders and encourage interest in STEM careers. (School Library Journal) This fun and accessible graphic novel for middle grade readers brings to light the lives of great but lesser-known Black scientists. Great Minds of Science is a kid-friendly introduction to some of the greatest scientists in history—doctors, engineers, mathematicians, and biologists. Each of them faced challenges as they rose to the top of their professions, but they didn't back down. They kept experimenting and questioning and learning, and they made significant contributions in each of their scientific fields. Black Lives is the new graphic novel series from award-winning author Tonya Bolden and illustrator David Wilkerson that celebrates the lives of Black innovators and legends and helps bring these histories to life. Celebrate the lives and contributions of Black scientists throughout history with the inspiring Great Minds of Science.

**Black People Invented Everything** Dr. Sujan K. Dass, 2020-02-01 Who invented the traffic light? What about transportation itself? Farming? Art? Modern chemistry? Who made...cats? What if I told you there was ONE answer to all of these questions? That one answer? BLACK PEOPLE! Seriously. And this book is like a mini-encyclopedia, full of more evidence than WikiLeaks and just as eye-opening! Do you know just how much Black inventors and creators have given to modern society? Within the past 200 years, Black Americans have drawn on a timeless well of inner genius to innovate and engineer the design of the world we live in today. But what of all the Black history before then? Before white people invented the Patent Office, Black folks were the original creators and builders, developing ingenious ways to manage the world's changes over millions of years, everywhere you can imagine, from Azerbaijan to Zagazig! With wit and wisdom (and tons of pictures!) this book digs deeper than the whitewashed history we learn in school books and explores how our African ancestors established the foundation of modern society! Have you inherited this genius? What can you do with it? Inspired by solutions from the past, we can develop strategies for a successful future!

**Changemakers in STEM** Dr. Artika R. Tyner, 2024-01-01 Women are creating change in all areas of science, technology, engineering, and mathematics. Learn about how Pooja Chandrashekar founded ProjectCSGirls and how Marie Tharp helped map the ocean floor. Then discover how women solve the world's hardest problems with STEM. From the past to the present, women are opening doors in many fields.

**Black Tech** Theresa Merritt-Watson,2023-09-05 Black Tech is designed to be the first of several books in a series to help African Americans learn and appreciate more about Black participation in the development of the United States. Black Tech is written for first- to third-grade readers, but its content is applicable to all ages. In the book, a young narrator presents Black inventors and their unique inventions in a colorful way that catches the eye of the reader. Some of these lesser-known inventors highlighted in the book include Gladys West, Jesse Russell, Alexander Miles, Frederick Jones, and other dynamic scientists and engineers. The book is designed to appeal to anyone with ten seconds to read short descriptions paired with colorful illustrations. The book is also designed to invoke pride in the readers and to encourage readers to pursue their own passions with purpose and clarity. Black Tech was born out of the author's belief in the importance of exposing young people to history early on, giving them all an opportunity to see themselves and their potential.
